

What AI FDE's do day-in & day-out

PART 1 – DISCOVERY & ANALYSIS

Understand the right problem deeply and integrate all dimensions of discovery.

- 1  Discovery is integration, not documentation
- 2  Every stakeholder defines success differently
- 3  The real problem is often hidden
- 4  Technical decisions are business decisions
- 5  Discovery creates architectural direction
- 6  AI governance begins during discovery
- 7  Discovery produces decision-ready artefacts
- 8  Discovery determines delivery success
- 9  Discovery is iterative
- 10  The discovery pack is a strategic asset

PART 2 – STAKEHOLDER & DECISION MANAGEMENT

Align people, navigate conflicts, and drive informed decisions.

- 1  Stakeholder management is continuous risk management
- 2  Stakeholder alignment is more valuable than stakeholder agreement
- 3  Every conflict requires a decision strategy
- 4  Escalation is a leadership skill
- 5  Evidence wins arguments
- 6  Executive communication requires synthesis
- 7  Different executives hear different messages
- 8  Influence without authority is the core FDE skill
- 9  Stakeholder conflict is normal
- 10  Consulting requires structured thinking under pressure

PART 3 – GOVERNANCE & DELIVERY EXCELLENCE

Deliver with trust, value and balance across business, technology and governance.

- 1  AI projects fail more often due to people than technology
- 2  Every deliverable must tell one story
- 3  ROI must balance value and risk
- 4  Governance is an enabler, not a constraint
- 5  An FDE bridges business, technology and governance
